PRINTING AND PHOTOGRAPHY DIVISION WEEKLY REPORT FOR PERIOD OF 18 November - 25 November 1986

I. Status of Tasks Assigned by Senior Management:

A. The Office of Logistics, Printing and Photography Division (OL/P&PD) has been preparing a proposal to improve the production of graphic material for the OL Quarterly. The emphasis will be on advance planning, attention to deadlines, format coordination, and artist participation in the initial planning stage. The proposal should be ready prior to the next Quarterly. Two representatives from P&PD have been requested by the Office of Logistics, Information Management Support Staff (OL/IMSS) to attend the next planning meeting for the Quarterly. At that time the proposal should be firm, hopefully with the result being improved presentations at a lower cost to P&PD.

II. <u>Items or Events of Major Interest that have Occurred</u>
<u>During the Preceding Week</u>

Approximately six weeks ago the Directorate of Operations, began sending requests for the preparation of briefing aids to the Office of Logistics, Printing and Photography Division (OL/P&PD) in support of a Presidential Initiative to conduct Cabinet Level briefings on terrorist activities. The briefing team 25X1 has been preparing to 25X1 25X1 The majority of P&PD work has consisted of the production of slides and vugraphs. The first part of one briefing was completed last week for the briefing team and the remaining work is expected to be complete within two 25X1 weeks.

- * D. On 22 November 1986 at 0130 the Office of Logistics, Printing and Photography Division (OL/P&PD) was tasked to make a large format blow-up of a printed map for a Presidential Briefing scheduled for 0830 the same day. The map
- required us to make a negative and one 20 x 24 color print mounted on foam core. The job was completed as scheduled with only four hours of overtime.
- E. On Friday, 21 November 1986, a representative from the Office of Logistics, Printing and Photography Division (OL/P&PD) saw a prototype of an RGB (Red-Green-Blue) analog videodisk at the regional office of Sony Corporation of America located in Lanham, Maryland. Friday's exhibit was the first United States showing of the RGB videodisk. This write-once disk has impressive quality and a thirty-year warranty on the life expectancy of the recorded images, but it will not be placed on the market for approximately one year. P&PD will be keeping a close watch on the developmental changes to this disk to see what applications it may have to the printing and photographic production environment.
